Class 1

High Tensile Bolts & Nuts

milsons

Product Disclosure Information Self-Assessment

Version: 231116

Product Name	Milsons High Tensile Bolts & Nuts
Product Identifier	BN88 (diameter x length*) (finish*) e.g. BN8812X50Z Note: Stainless products display the grade before the diameter.

Declaration

Milsons 2012 Ltd has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

Product Description

Bolts are threaded fasteners that are used to connect two or more parts, usually along with washers and nuts. The standard bolt type has a hexagonal head. The dimensions and mechanical properties of bolts are based on international standards (ISO4014-8.8/ISO4032-8 & AS2465 G8 / AS2465 G8). Milsons range of high-strength Bolts are designed for use in a variety of construction applications. Milsons offer a broad selection of sizes and finishes of bolts that are suitable for both interior and exterior use. (Test Certificates are available for this product on request).

Scope of Use

High tensile bolts intended uses are primarily for heavy or high-stress fastening applications and can be used in applications that require a high level of clamping force.

Conditions of Use

The responsibility for choosing the correct size/diameter and finish of the product, as well as applying the appropriate torque during installation in accordance with the application's requirements, rests with the user. To facilitate your decision-making process, we recommend consulting our technical guides, available at the following web address: <https://milsons.co.nz/category/technical-resources>.

Contribution to Building Code Clauses

Relevant Code Clauses	Contributions to Compliance
B1 Structure — B1.3.1, B1.3.2, B1.3.3 (b, d, e, f, g, h, j, q), B1.3.4	Compliance with B1 Structure is contingent upon the design crafted by the designated professional, such as a consulting structural engineer or architect. Design data is accessible to these professionals to ensure compliance with the provisions stipulated in NZS 3603 or AS/NZS 1720 & NZS 3404 Parts 1 and 2:1997. Refer to the AS/NZ standard and installation requirements for further information.
B2 Durability — B2.3.1 (a)	The product is offered in multiple coating options or in stainless steel. Compliance with B2 Durability is contingent upon the selection of the most appropriate coating or material, in accordance with the specific application. This decision should be based on the required durability for the intended use, taking into consideration the environmental conditions in which the product will be situated. This should be made by the designer.
F2 Hazardous building materials — F2.3.1	These products are safe when handled and do not contain or emit harmful materials. There are no requirements for this product in order to comply with Acceptable Solution F2/AS1, First Edition Amendment 3, 2017.
